

Let the power of AI reduce document overload for finance pros.

Finance is flooded with documents.

Between the sheer volume of documents, the amount of detailed information they contain, and the short turnarounds to process them, financial professionals can always use help fulfilling demands.

Previously, analyzing all the data contained within reports, receipts, spreadsheets, budgets, forecasts, and contracts could be maddeningly slow. Teams had to wait for someone to manually compile the docs before deriving clear insights and taking action. This painstaking process that also demanded absolute accuracy — a challenge when processing copious documents of many kinds.

The unified platform that propels progress.

Adobe Acrobat Studio is the AI-powered, all-in-one platform that makes it faster to go from the document deluge to actionable decisions, all from within a single workspace. Built on Acrobat Pro for easy adoption, Acrobat Studio features meet financial teams where they work.

- Use AI Assistant to instantly summarize key insights, analyze historical forecasts and spending, and surface potential risks or anomalies.
- Centralize up to 100 relevant documents in a secure, shared workspace with contributors and stakeholders to review findings and align on actions.
- Get traceable references and citations to validate accuracy.
- Redact sensitive information easily to ensure confidentiality.
- Share final reports securely as PDFs for sign-offs.
- Use Adobe Express from within Acrobat Studio to easily create polished, on-brand presentations.

A solution built for volume and validation.

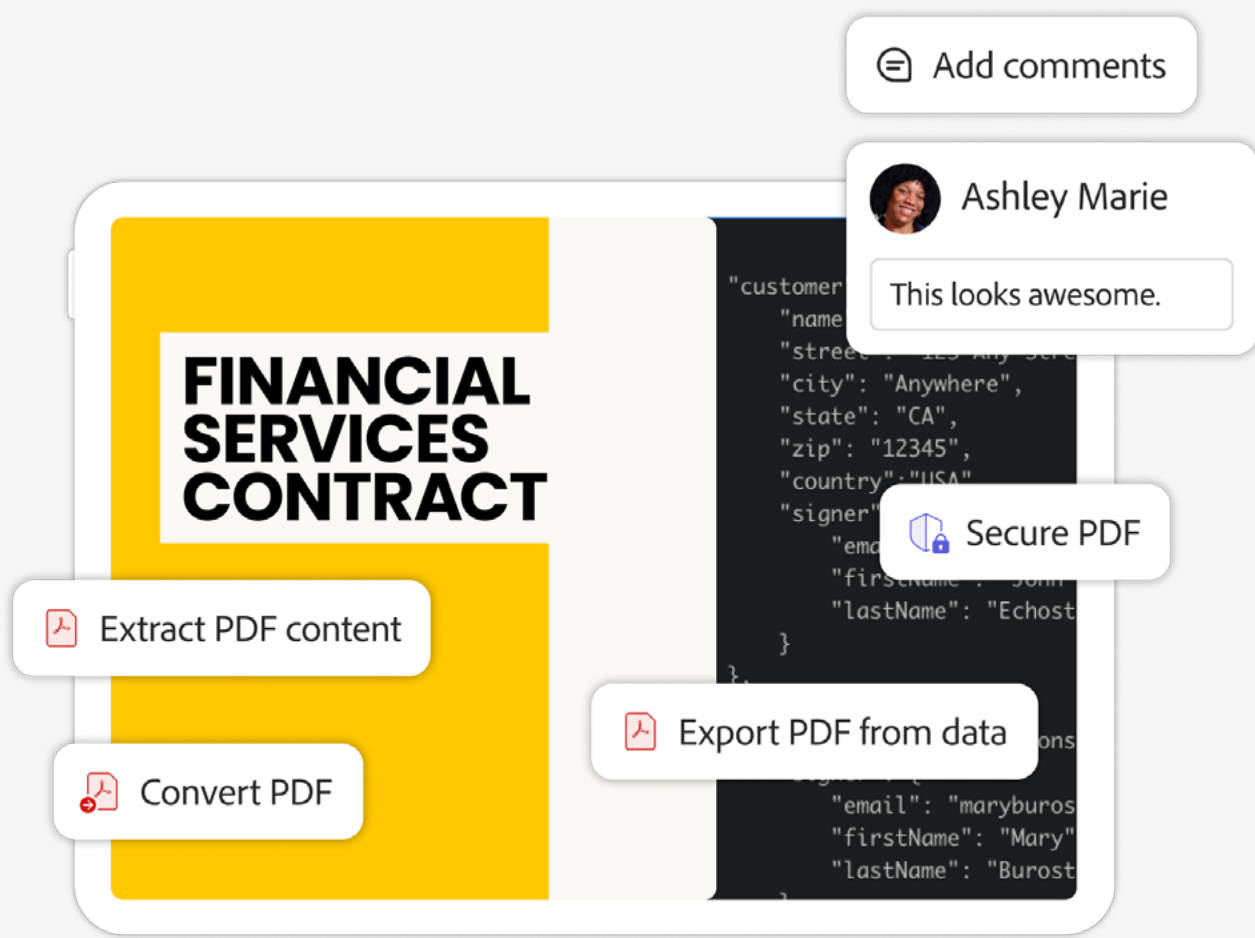

With a range of needs from accelerating complex financial reporting and vendor analyses to turning processing forecasts into clear decisions, Acrobat Studio centralizes the process onto one intelligent platform, saving time while increasing accuracy.

Imagine that you're performing an annual audit, and the preparation includes culling data from invoices, contracts, reconciliations, and other supporting documents. Plus, you have ongoing reviews based on auditors' requests. Acrobat Studio helps you through every critical step:

- Comprehend:** AI Assistant rapidly summarizes requests and supporting documents to identify insights, gaps, and deadlines — while providing clickable citations for verification.
- Collaborate:** Centralize all your documents in a shared PDF Space so contributors and stakeholders from finance, accounting, or other teams can review, comment, or ask questions.
- Create:** Combine reconciliations, schedules, and supporting documentation into clear, audit-ready PDFs that are easy to review and validate.
- Control:** Familiar features from Acrobat Pro let you secure, redact, and use permissions to share audit documentation PDFs for compliance.

Almost all financial professionals **(98%)** actively edit, sign, combine, convert, and collaborate with PDFs — and more than **1/3** do so very frequently (11 times or more a month).
